EDUCATION

İzmir University of Economics

2024 – Present

Associate Degree in Computer Programming

İzmir Atatürk Anadolu High School

2018 – 2022

PROJECTS

Mobile Mouse — Computer Control via Hand Gestures

2026 – Present

Backend Developer | Team Project

- Building a hand-gesture-based mouse control system using Python, OpenCV, MediaPipe, and Flask.
- Designed WiFi-based REST/JSON HTTP communication between a mobile device camera and PC.
- Managing Jira workflow and backend architecture in a 3-person Agile team.

Personal Finance Assistant — REST API

2024 – 2025

Individual Project Python, Flask, JWT

- Developed a REST API supporting income/expense tracking, category-based budget limits, and savings goals.
- Implemented JWT-based authentication and a modular endpoint structure.

Event Management Platform

2024 – 2025

Individual Project PHP, MySQL

- Built a full-stack platform where users can register for events and admins manage the system.
- Designed the relational database schema and an admin panel for content management.

Other Projects

2024 – 2025

- Mental Bunny — mobile app concept for stress management and mental well-being (in progress).
- CodeDungeon — gamified browser-based coding education platform with pixel art theme (in progress).
- Hotel database, Calculator (C#), Hotel & Bakery Automation, Python Pomodoro Timer (GUI).
